PROFILE

IT engineer with 10+ years of experience operating web infrastructure at scale — Linux servers, Docker-based deployments, CI/CD automation. In 2025, built and operated a self-hosted **14-service Supabase stack** on Hetzner VPS for a production healthcare platform. Focus on reliable, self-operated infrastructure and reproducible automation. Based in Stuttgart since June 2025. Available immediately, hybrid preferred.

PROFESSIONAL EXPERIENCE

Independent IT Projects & Professional Development

11/2025 – present

Stuttgart, Germany

- Development of self-hosted infrastructure solutions (eigenstack, eigenbase) using Ansible, Docker, Kubernetes (K3s/Minikube in local test environments).
- Open-source project *local-whisper-obsidian* — fully offline voice-to-note pipeline (Python, systemd, Docker).
- Preparing for Microsoft AZ-104 (Azure Administrator Associate) — in progress.
- Completed German B1 Integrationskurs (certificate 2026).

Infrastructure & Mobile Engineer

02/2025 – 10/2025

Freelance contract · Medical SaaS Platform (gastroenterology) · Remote

- Architected and operated a self-hosted Supabase stack of **14 Docker services**: Kong API gateway, GoTrue auth, PostgREST, Realtime engine, Storage, Edge Functions (Deno), Supavisor connection pooler, Caddy reverse proxy, Vector log aggregation.
- Migrated production backend from Supabase Cloud to Hetzner VPS (Ubuntu 22.04) — data residency compliance, no critical downtime.
- Diagnosed and resolved critical Supabase Realtime failures, restoring live sync across iOS, Android, and web admin portal.
- End-to-end iOS & Android release pipelines: code signing, App Store Connect, Google Play Console.
- Security hardening: UFW, SSH hardening, secrets via environment variables, container network isolation, log rotation.

Infrastructure Engineer (Project-based)

2022 – 2024

Web Infrastructure · Remote

- Server migration, cost optimisation, and CMS modernisation for existing web projects.

Lead IT Operations

2017 – 2022

Web Publishing & Infrastructure

- Built and scaled infrastructure for a portfolio of **700+ active web projects** with a distributed team of up to 20 (developers, editors, freelancers).
- Full server stack ownership (Apache / Nginx / MySQL) — provisioning, performance tuning under variable load, monitoring, cost optimisation.
- Managed team workflows, contractor relationships, and technical project delivery.

TECHNICAL SKILLS

Cloud & Infrastructure:	Hetzner Cloud, Microsoft Azure (AZ-104 in progress), Linux (Ubuntu / Debian), Nginx, Caddy, Traefik
Containers:	Docker, Docker Compose (production multi-service stacks), Kubernetes (K3s/Minikube, local)
CI/CD & Automation:	GitHub Actions, Ansible (IaC), Bash scripting, systemd service management
Database & Backend:	PostgreSQL, Supabase (self-hosted & cloud), Supervisor / pgBouncer, Firebase (FCM), REST APIs
Monitoring:	Uptime Kuma, Vector log aggregation, Prometheus / Grafana (in progress)
Scripting:	Bash, Python, YAML, SQL

EDUCATION & CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate (AZ-104)	in progress
EF SET English Certificate — C1 Advanced	May 2026
German Integration Course — B1 Certificate	2026
Pedagogical University — Social Psychology (Diploma)	2004 – 2009
