

Serg Markovich

DevOps / Platform Engineer

Stuttgart Area, Germany

me@serg-markovich.de | serg-markovich.de | LinkedIn | GitHub

Infrastructure engineer and former IT entrepreneur with 10+ years running web operations at scale — up to 700 live properties, team of 20, full server stack ownership. In 2025, delivered backend infrastructure and mobile UI for an international medical SaaS platform. Currently building open-source DevOps tooling and preparing for AZ-104. Office-based, immediately available in Stuttgart.

TECHNICAL SKILLS

Cloud & Infra:	Microsoft Azure (AZ-104 in progress), Hetzner Cloud, Linux (Ubuntu/Debian), Nginx, Traefik
Containers:	Docker, Docker Compose, Kubernetes (lab environment)
CI/CD & Automation:	GitHub Actions, Ansible (IaC provisioning), Bash scripting, systemd service management
Database & Backend:	PostgreSQL, Supabase (self-hosted & cloud), Firebase (FCM), REST APIs
Mobile & UI:	FlutterFlow, App Store Connect, Google Play Console
Monitoring:	Uptime Kuma, Prometheus / Grafana (in progress), systemd journald
Scripting:	Bash, Python, YAML, SQL

PROFESSIONAL EXPERIENCE

Infrastructure & Mobile Engineer

Feb 2025 – Oct 2025

Contract · International Medical SaaS Platform · Remote

- Migrated production backend from Supabase Cloud to self-hosted Dockerized stack on Hetzner VPS (Ubuntu 22.04) — data residency compliance, no critical downtime.
- Operated multi-service Docker Compose environment: reverse proxy, database, realtime engine, storage, auth, API gateway.
- Built mobile UI using FlutterFlow; managed end-to-end release pipelines for iOS and Android including code signing and store publication.
- Security baseline: UFW firewall, SSH hardening, secrets via env vars, container network isolation.
- Unified push notification layer: Firebase Cloud Messaging, OEM push (OnePlus), transactional SMTP.

Web Media Operations Lead

2017 – 2022

Co-founder · Web Publishing & Infrastructure

- Co-founded web media business: managed portfolio of **700+ live web properties** with distributed team of up to 20 (developers, editors, freelancers).
- Owned full server stack (Apache / Nginx / MySQL) — provisioning, performance tuning under variable traffic, uptime monitoring, cost optimisation.

Independent Infrastructure & Web Operations

2022 – 2024

Self-employed · Web Operations

- Maintained remaining web infrastructure independently — server consolidation, cost reduction, CMS platform experimentation.

OPEN SOURCE PROJECTS

github.com/serg-markovich

- eigenbase** — One-command Ubuntu 24.04 bootstrap via Ansible: Docker, Kubernetes, Azure CLI, Ollama, dotfiles.
- openwebui-systemd-stack** — Production-ready local AI stack (Ollama + Open WebUI), Docker, systemd, GDPR-compliant, no cloud.
- local-whisper-obsidian** — Offline voice-to-note pipeline: faster-whisper on CPU, Python, systemd, Syncthing. No API keys.

EDUCATION & CERTIFICATIONS

Certification:	Microsoft AZ-104 (Azure Administrator Associate) — <i>In Progress, 2026</i>
Languages:	German: B1 (Integrationskurs, 2026) · B2 spoken English: C1 Advanced (EF SET, May 2026) Ukrainian / Russian: Native
Degree:	Pedagogical University, Social Psychology — 2004–2009
