PROFILE

IT engineer with 10+ years of experience operating web infrastructure at scale — Linux, Docker, CI/CD automation. In 2025, built and migrated a production **14-service Supabase stack** to Hetzner VPS for a healthcare platform — no critical downtime, GDPR-compliant. Focus on reliable, reproducible infrastructure and Infrastructure as Code.

EXPERIENCE

Independent IT Projects & Professional Development

11/2025 – present

Stuttgart, Germany

- Self-hosted infrastructure solutions **eigenstack / eigenbase** — Ansible, Docker, Kubernetes (K3s/Minikube)
- Open-source: *local-whisper-obsidian* — fully offline voice-to-note pipeline (Python, systemd, Docker)
- Preparing for Microsoft AZ-104 (Azure Administrator Associate)

Infrastructure & Mobile Engineer

02/2025 – 10/2025

Freelance contract · Healthcare SaaS Platform · Remote

- Migrated production backend from Supabase Cloud to self-hosted Hetzner VPS — **14 Docker services**, no critical downtime, GDPR-compliant
- Stack: Kong API gateway, GoTrue auth, PostgREST, Realtime, Caddy reverse proxy, Vector log aggregation
- Security hardening: UFW, SSH hardening, secrets management, container network isolation
- End-to-end iOS & Android release pipelines — code signing, App Store Connect, Google Play

Infrastructure Engineer (Project-based)

2022 – 2024

Web Infrastructure · Remote

- Server migration, cost optimisation and CMS modernisation for existing web projects

Lead IT Operations

2017 – 2022

Web Publishing & Infrastructure

- Built and scaled infrastructure for **700+ active web projects** — distributed team of up to 20 people
- Full server stack ownership: Apache / Nginx / MySQL — provisioning, performance tuning, monitoring, cost optimisation
- Managed team workflows, contractor relationships and technical project delivery
